Ed,

I was quick to send the map in but I just realized you may have another system going. Anyway, do you have the answer to Rick's question?

Will we be able to see IDs that are blank in the MDP?

The map book displays a map ID for subject parcels on each page. In some cases, certain larger parcels included a large number of APNs associated with the same piece of land. In those instances I labeled those APNs as a range, as you will see beginning on page 2 of the map book (example shown below).
